511 IAC 6.2-4-3 Core principles of professional development

Authority: IC 20-19-2-11; IC 20-20-31
Affected: IC 20-31-5

Sec. 3. The following are core principles of professional development:

(1) Professional development programs will address issues that are relevant to the priorities of education improvement and reflect the knowledge base of the profession by doing the following:

(A) Reflecting research-based approaches to effective adult learning, student learning, and organizational change to support ongoing developmental activities. While tapping educators' life experiences and drawing on the knowledge base from effective research, a variety of modes of learning are used to foster self-directed professional development opportunities.

(B) Integrating education improvement priorities. Consistent and continuous links are made with the school improvement plan, the Indiana professional standards board, and the Indiana state board of education policy.

(C) Incorporating both discipline-specific and interdisciplinary approaches to teaching, assessment, and preparation for the world of work. Professional growth experiences enhance educators' knowledge within and across subject areas and their ability to foster and assess students' problem solving and critical thinking skills.

(D) Including explicit strategies for setting high expectations and meeting the diverse learning needs of all students. Training activities increase educators' capacity to implement developmentally-appropriate practices to establish challenging learning goals and respond to the uniqueness of each student.

(E) Receiving adequate resources. Every public school in Indiana must receive the financial resources and support services needed to provide the most effective professional development program, as described within these principles.

(2) Professional development program will engage educators in an effective learning process that impacts practice by doing the following:

(A) Actively involving participants in program design, delivery, and implementation. Professional growth opportunities reflect educators' needs as determined from multiple data sources grounded in and linked with the school improvement plan. All stakeholders shall be engaged in meaningful job-embedded opportunities to effectively support practice that lead to improved student learning.

(B) Promoting multiple strategies that model recommended strategies. Opportunities for professional development incorporate varied approaches, such as theory, demonstration, reflection, practice, mentoring, technology applications, and peer dialogue and coaching.

(C) Incorporating follow-up activities that are sustained over time and provide educators with ongoing feedback. The professional development program provides a range of opportunities for staff to integrate the new strategies into their work with children through practice, feedback, and reflection.

(D) Continuously evaluating impact on educators' practice and student learning. The effectiveness of professional development is determined by its impact on staff performance and student learning.

(3) Professional development programs will contribute to developing an environment that support educators' professional growth by doing the following:

(A) Fostering collegiality and collaboration. Professional growth opportunities encourage staff to build a community of educators, parents, business, and community partners who exchange ideas for innovation, cooperate in developing curricula, and discuss approaches to strengthening student learning by focusing on the school community as a culture of inquiry.

(B) Building capacity through a continuum of ongoing improvement activities. Professional development activities maintain a focus on the improvement of practices that increase student learning and link to the school improvement plan and the standards developed by the Indiana professional standards board and the Indiana state board of education policy.

(C) Integrating staff development into educators' practice. The professional development program incorporates supports for staff to implement newly acquired strategies and assess them for their impact on student learning.

(D) Encouraging innovation and risk-taking. As a result of staff development activities, the school community recognizes the need for action research which assists educators, leading toward innovations improving student learning.

60.0 - 69.9% = 1.00 points

0.00 - 59.9% = 0.00 points.

(g) One (1.00) point shall be deducted from a small school's preliminary English/language arts score if:

(1) the cumulative aggregate described in subsection (f) includes at least forty (40) students; and

(2) fewer than ninety-five percent (95%) of the students in the cumulative aggregate were tested on the English/language arts component of the mandatory annual assessments.

(i) A small school's preliminary mathematics score shall be based on the combined ISTEP+, IMAST, and ISTAR passing percentages for the cumulative aggregate in accordance with the scale in subsection (f).

(j) One (1.00) point shall be deducted from a small school's preliminary mathematics score if:

(1) the cumulative aggregate described in subsection (f) includes at least forty (40) students; and

(2) fewer than ninety-five percent (95%) of the students in the cumulative aggregate were tested on the mathematics component of the mandatory annual assessments.

(k) A small school's mathematics grade shall be determined by the final score resulting from the application of subsections (i) and (j) in accordance with the scale in subsection (h).

(l) The board shall assign the small school's performance and improvement category grade as determined by one (1) of the following:

(1) The grade in the subject area if only one (1) subject area is graded.

(2) The average of the sum of the points for the English/language arts and mathematics grades in accordance with the following:

3.51- 4.00 points = A

- (1) School corporation.
- (2) Public school.
- (b) The initial measurable objective shall be the starting point.
- (c) The annual measurable objective shall increase with each intermediate goal.

(d) Equal increments in achievement, to ensure that all students become proficient by the 2013-2014 school year, shall be calculated as follows:

STEP ONE: Subtract the starting point from one hundred percent (100%).

STEP TWO: Divide the remainder by six (6).

(e) Intermediate goals shall be determined by adding the STEP TWO of subsection (d) result to the initial measurable objective and to the resulting objective for the following school years:

Sec. 5. (a) Beginning with data for the 2001-2002 school year and each subsequent year, for a school or school corporation

to make adequate yearly progress under this section:

(1) each group of students described in section 6 of this rule must meet or exceed the measurable objectives in English and the measurable objectives in mathematics under section 4 of this rule, except that if any group does not meet those objectives in any particular year, the school or school corporation shall be considered to have made adequate yearly progress if the percentage of students in that group who did not meet the pass level of academic achievement on ISTEP+ for that year decreased by ten percent (10%) of that percentage from the preceding school year and that group made progress on the other academic indicators described in section 8 of this rule;

(2) the school or school corporation meets or exceeds the other academic indicators under section 8 of this rule; and

(3) not less than ninety-five percent (95%) of each group of students described in section 6 of this rule who are enrolled in the school are required to take state assessments in English and not less than ninety-five percent (95%) of each group of students described in section 6 of this rule who are enrolled in the school are required to take state assessments in mathematics, including an alternate:

(A) assessment for students with disabilities; and

(B) form of assessment for limited English proficient students;

except that the ninety-five percent (95%) requirement shall not apply in a case in which the number of students in a group is fewer than forty (40).

(b) The ninety-five percent (95%) requirement for each subject area shall be calculated using the number of students in the:

(1) group who participated in the assessments as the numerator; and

(2) group enrolled in the school or school corporation on the ADM count date established under 511 IAC 1-3-1.

(c) Consecutive years of failing to make adequate yearly progress shall be based on failing to meet the measurable annual objective in the same subject (English or mathematics) for consecutive years. If a school or school corporation in a given year fails to meet the annual objective in English but meets the objective in mathematics and in the next year one (1) or more student groups under section 6 of this rule fails to meet the objective in English, the school or school corporation has failed to make adequate yearly progress for two (2) consecutive years. If, however, the school or school corporation meets the annual objective in English for all student groups in the second year, then the timeline restarts. If the school or school corporation fails to meet the annual objective in mathematics, it has now failed to make adequate yearly progress for one (1) year. If the school or school corporation meets the annual objective in mathematics, the school or school corporation has no consecutive years of not making adequate yearly progress. *(Indiana State Board of Education; 511 IAC 6.2-7-5; filed Aug 26, 2003, 4:15 p.m.: 27 IR 164; readopted filed Nov 4, 2009, 12:03 p.m.: 20091202-IR-511090701RFA)*

(A) American Indian.

(B) Asian.

(C) Black.

(D) Hispanic.

(E) White.

(b) Disaggregation of data under subsection (a) is not required if:

(1) a group has fewer than thirty (30) students;

(2) the failure of the group of students to make adequate yearly progress is not statistically significant, as determined by a one-tailed binomial test of significance using an alpha level of .01.

(c) Provisions of section 5 of this rule or this section notwithstanding, groups of students as small as ten (10) shall be reported for information purposes only.

(d) To protect the confidentiality of individual data, percentages close to zero (0) shall be reported as "less than five percent (5%)" and percentages close to one hundred (100) shall be reported as "greater than ninety-five percent (95%)".
