

2/8/2021

Dear PLA Families,

We are excited to announce that Phase I of our pilot job training program, PLA University, will launch on **Monday, March 22nd with Health & Life Sciences Training**. PLA University is a free workforce development program exclusively for PLA families. Through PLA University, we hope to provide our scholar family members who are adult learners with the access, skills, experience, and job placement support to get a job in some of Indiana's most in demand fields. We want to help any relative of our scholars learn more so that they can earn more. Whether you have an uncle, cousin, sister or brother who may be interested, please have them apply today to reserve their seat!

While our Health & Life Sciences track is starting first as the most in demand program, upcoming career tracks include: Information Technology, Advanced Manufacturing and Supply Chain and Logistics. Please scan the QR code (right) with your camera phone to apply to join your training program of choice. You can also apply at PLAUniversity.org. If you have any additional questions, do not hesitate to reach out to your school leader or contact the program manager, Shayne Abrahams, at info@plauniversity.org.

We are excited to extend this opportunity to our families. We have a true commitment to improve the lives of our scholars through education and this new program allows us to support whole families as well! Thank you for being a part of PLA! The best is yet to come.

Highest Regard,

Nicole Fama

YOU ARE THE NEXT SUCCESS STORY

....CHOOSE YOUR PATH in Health & Life Sciences

With so many possibilities across dozens of fields, careers in the health and life sciences are many and varied. Pursue a career in Health & Life Sciences and learn how to take knowledge from science and apply it to research and clinical practices to maintain and improve the health and wellbeing of others- combining a love for science with the desire to help people.

Health & Life Sciences Training begins March 22, 2021. Scan the code with your camera phone to apply!

PLA UNIVERSITY

PLA University is a workforce development program that helps young adults and adults from Marion County achieve economic sustainability for themselves and for their families. We partner with corporations and organizations to help PLA family members learn skills in in-demand fields.

Land a new career in our most in demand field starting off making \$30,000 - \$50,000 per year. Learn more and earn more!

We also offer career tracks in Advanced Manufacturing, Supply Chain & Logistics, and Information Technology.

Apply now at www.PLAUniversity.org

¡La próxima historia de éxito es usted!

¡Elige un camino profesional en las ciencias de la salud y la vida!

Hay muchas opciones profesionales, pero las posibilidades dentro del campo profesional de las ciencias de la salud y de la vida son ilimitadas.

Cuando elige una carrera en ciencias de la salud y la vida, combinará el amor por ayudar a los demás y las ciencias. Aprenderá a utilizar el conocimiento científico para investigar y aplicar prácticas clínicas que mantienen y mejoran la salud y el bienestar de los demás.

El 22 de marzo de 2021 comienzan los cursos de ciencias de la salud y de la vida. Para aplicar, utilice la cámara de su teléfono celular para escanear el código.

PLA University es un programa de fuerza laboral que ayuda a los adultos del condado de Marion a obtener sostenibilidad económica para ellos y sus familias.

Nos asociamos con corporaciones y organizaciones para ayudar a las familias PLA a aprender habilidades únicas para campos profesionales de alta demanda.

Gane entre \$30.000 y \$ 50.000 por año una vez que obtenga un trabajo en estos campos profesionales de alta demanda. ¡Cuando aprende más, gana más!

También ofrecemos programas de carrera como fabricación avanzada, cadena de suministro y logística y tecnología de la información.
